SOFT SKILLS

Versatile, Proactive, Active Listener, Open to Criticism, Teaching/Mentoring, Synergistic, Transparent, Able to Resolve Conflicts, Exemplary Communication Skills, Empathetic, Team-Oriented Personality

PROJECTS

Sheltr |**repo**: https://bit.ly/sheltrrepo|https://bit.ly/sheltrdep
- Application enables users to swipe on sheltered dogs posted for adoption (Tinder-inspired)
- Sheltr is an application that shows real data on sheltered dogs and permits users to swipe right, or left on cards that show the dogs' name, and location. It is a full MERN stack application built by my team and I.
- Responsibilities: Project Lead, Express.js server, React components, Node.js, Mongoose database query, GraphQL queries/mutations
- Tools/Languages: React, Express.js, Node.js, MaterialUI, GraphQL, CSS, Mongoose, MongoDB, Apollo-Server, Apollo Client

Tech Blog |**repo**: https://github.com/echo1826/Tech-Blog | https://tech-blog-ec.herokuapp.com/
- Blog site that allows users to post about anything tech related
- The Tech Blog provides an alternative for users who want a different forum to discuss anything tech related. The project was done individually so all responsibilities were done by me.
- Tools/Languages: Handlebars, JavaScript, Express.js, Node.js, Bootstrap, MySQL, Sequelize, Express-Session, Moment.js, Bcrypt

Express.Gym |**repo**: https://github.com/nicoledodge/express.gym | https://express-gym.herokuapp.com/
- Gym site that authorizes users to sign up for membership
- Express.Gym permits users who signed up for memberships to register themselves into a class offered by the gym. My responsibilities were Project Manager, Handlebars, Creating Express Routes, JavaScript
- Tools/Languages: Handlebars, JavaScript, Express.js, Node.js, Bootstrap, MySQL, Sequelize, Express-Session, Bcrypt

EDUCATION

University of Texas, Austin | Full-Stack Programming Professional Certificate
Udemy | Algorithms and Data Structures
